

## 200mm Inline heat transfer fan kit

### 200mm Inline heat transfer fan kit

The Heat Transfer Kit is specially designed to economically draw warmed air from the room with the main heat source [such as a fireplace or combustion stove] and convey it to other rooms in your home. Re-distributes air from One Room to Three Rooms. Ideal way to boost warmth and comfort levels in bedrooms and chilly study areas. Easy to install. Improves the energy efficiency of the home.
